📍 Ban Co Ward, Ho Chi Minh City

I aim to develop my career in a dynamic environment where I can apply my foundational knowledge of technology and process management. In the short term, I focus on gaining practical experience and improving my teamwork skills. In the long term, I aspire to become a key contributor who can take on important roles in optimizing workflows and delivering sustainable value to the organization.

EDUCATION

2022 - 2026

Nguyen Tat Thanh University

Faculty of Information Technology – Software Engineering

GPA: 3.8 /4.0

WORK EXPERIENCE

• 7/2025 - 12/2025

Beauty LittleFish - E-commerce Website (Academic Project) - 6 Members

Team Leader & Full-stack Developer | [Source Code](#)

Technologies: ASP.NET Core 8.0, SQL Server, Google Analytics, Mailchimp.

Description: A cosmetics e-commerce system with 3 modules (Admin, Staff, Customer), covering the full ordering and management workflow.

Key contributions:

- System architecture: Designed the SQL Server database (29 tables) and built complex voucher/promotion processing logic to ensure data integrity.
- Optimization & Marketing: Implemented SEO features (sitemap, automatic slug generation) and integrated Google Analytics to track user behavior effectively.
- Project management: Led a 6-member team, reviewed code, handled GitHub merges, and resolved 100% of UI/UX issues before deployment.

• 04/2026

MATA - Task Management Application (Personal Project)

Frontend Developer | [Source Code](#) | <https://twngvi.github.io/M-Task>

Technologies: HTML5, CSS3, JavaScript, SortableJS, localStorage, JSON Import/Export.

Description: A task management application based on the Kanban model, focused on drag-and-drop interactions, task status management, and local data storage.

Key contributions:

- Built a 3-column Kanban board: To Do, Doing, Done.
- Implemented drag-and-drop task movement across columns using SortableJS.
- Developed features for adding, editing, completing, duplicating, and filtering tasks.
- Integrated rich text descriptions, datetime handling, color tags, and task priority management.
- Supported JSON import/export, localStorage persistence, and dark mode.

SKILLS

Technical Skills

Backend: Python, C++

Frontend: HTML5, CSS3, JavaScript

Database: Microsoft SQL Server

Tools: Git, GitHub, Visual Studio Code, Power BI (Data Analysis), Trello, Figma

Soft Skills

- Problem-solving mindset
- Teamwork and collaboration skills
- Strong self-learning ability and adaptability to new technologies
- Team leadership and time management skills

CERTIFICATIONS
